Sign out

Free trial

## Activate your 60-day free Fabric trial capacity

When you sign up, you'll get a free Fabric trial capacity and a free Power BI individual user trial that give you access to the core workloads and features available in Fabric.

[What's included?](#) ⓘ

You'll be able to:

- Integrate data from anywhere into a single, multi-cloud data lake, and work from the one copy of data across analytics engines
- Use role-specific workloads to transform, analyze, visualize, and act on your data—all in a single, governed experience
- Share and collaborate on your self-service analytics

Your trial capacity will be located in your Fabric tenant's home region by default. Unless you need to change the capacity's region, we recommend that you accept this default. If you move this capacity to a different region now, you won't be able to change its region again.

### Trial capacity region

Default - North Europe

By choosing Activate, you agree to the [terms and conditions](#). ⓘ
